DOWON
INTERNATIONAL

Connecting Korean Manufacturing with Global Markets

Your Sourcing Partner

Discover specialized industrial products, equipment and manufacturing capabilities from South Korea.

KOREAN MANUFACTURING SOLUTIONS

Connecting Korean Manufacturing with Global Opportunity

Access specialized manufacturing knowledge and products through a single sourcing contact.

A better way to find the right manufacturing partner

South Korea is home to specialist manufacturers in machining, industrial equipment, automation and custom production. Yet their capabilities are not always easy for overseas buyers to discover. DOWON INTERNATIONAL helps interpret requirements and coordinate sourcing and trade discussions.

TECHNICAL UNDERSTANDING / SOURCING / TRADE

Korean Manufacturing, Connected to the World

Discover new opportunities for sourcing industrial components and equipment from South Korea.

SOUTH KOREA / GLOBAL SOURCING

Illustrative connections only. The map does not represent existing customers or completed exports.

We connect overseas purchase requirements to suitable Korean manufacturing capabilities. We help coordinate technical specifications, quotations, commercial terms and export processes.

One Point of Contact.
Practical Sourcing Solutions.

From an initial inquiry to export coordination and technical follow-up.

01

Supplier sourcing

Identify and assess manufacturers against the required specifications.

02

Technical coordination

Support drawing, material, process and quality discussions.

03

Quotation & contracting

Coordinate pricing, lead times and commercial terms.

04

Export & trade support

Coordinate applicable L/C, shipping and customs documentation.

05

After-sales communication

Help arrange questions, follow-up requests and claim discussions.

06

Single communication channel

Reduce the need to coordinate individually with multiple suppliers.

Components, Equipment and Industrial Solutions

The supply scope is verified individually against your specifications and available partners.

Precision components

Machined metal parts

Industrial equipment

Machines and industrial systems

Automation systems

Production and handling solutions

Custom manufacturing

Fabrication and assemblies

Illustrative images. Availability and supply capability are confirmed for each project.

Why DOWON INTERNATIONAL?

An engineering perspective combined with international trade coordination.

01

Engineering-led understanding

Review industrial needs through a manufacturing and technical perspective.

02

One communication channel

Coordinate commercial and technical discussions through one point of contact.

03

Structured trade coordination

Organize export documents, payment conditions and shipment steps.

04

Long-term partnership

Support repeat orders and further technical collaboration.

Understand buyer needs. Connect Korean manufacturing expertise.

A Clear Process, From Inquiry to Delivery

Structured support from RFQ through export and follow-up communication.

01

Inquiry & RFQ

Send the item, drawing, specification, quantity and target lead time.

02

Technical review

Review required standards and production feasibility.

03

Supplier sourcing & quotation

Assess a suitable partner and propose terms.

04

Contract & export

Arrange documents, shipment and agreed commercial conditions.

05

Delivery & follow-up

Coordinate questions and further technical support.

RFQ > SOURCING > CONTRACT > EXPORT > SUPPORT
